

## List of PABP Validated Payment Applications

***Last Revised: August 2010\****

The following List of PABP Validated Payment Applications have been assessed for compliance with the Payment Application Best Practices (PABP). Only those versions of the application identified in the listing below have been evaluated and determined to comply with PABP. Compliance with the PABP is determined based upon data and information developed by an evaluation of the application by a Qualified Payment Application Security Company (QPASC). Although Visa reviews the QPASC-developed data and information, Visa does not independently confirm such data or information nor does Visa perform any tests or analysis of the functionality, performance or suitability of any of the applications and/or products listed. Visa makes no endorsement or recommendation of applications or products, or of their respective developers or distributors. Furthermore, Visa makes no warranties, guarantees or representations that any of the applications or products will meet your requirements for performance or functionality, that the applications or products will be free from errors or malicious code, or that the applications or products will be compatible with any other systems or applications. Any and all representations or warranties, including any and all representations and warranties made by the payment application vendor, are disclaimed by Visa.

The information provided herein is provided "AS IS" with no warranties, expressed or implied, including, but not limited to, the implied warranties of merchantability and fitness for a particular purpose and/or non-infringement. The information provided herein is subject to change by Visa, with or without notice. Although Visa makes good faith efforts to provide accurate and complete information, merchants, or anyone else utilizing the information set forth on the following List of PABP Validated Payment Applications remain responsible for confirming the accuracy of the information set forth below, including but not limited to, confirming with the appropriate payment application vendor that the version of the application identified below is in compliance with PABP. Use of any one or more of the applications below (i) does not guarantee or ensure compliance with the PCI DSS; and (ii) does not satisfy any Acquirers' obligation to perform their own evaluation and due diligence, to ensure the PCI DSS compliance of their merchants and agents.

### **PA-DSS Validated Payment Applications**

In 2008, the PCI Security Standards Council (PCI SSC) adopted Visa's PABP and released the standard as the Payment Application Data Security Standard (PA-DSS). The PCI SSC is responsible for maintaining and updating the PA-DSS and all related documentation, Payment Application Qualified Security Assessor (PA-QSA) qualification and training, Reports of Validation (ROV) submissions and quality assurance as well as the listing of PA-DSS validated payment applications. The PA-DSS now replaces PABP for the purpose of Visa's compliance program.

For more information on the PA-DSS, including program and validation requirements please visit the PCI SSC website at [www.pcisecuritystandards.org](http://www.pcisecuritystandards.org). For PCI SSC's List of PA-DSS Validated Payment Applications please visit: [www.pcisecuritystandards.org/security\\_standards/vpa/](http://www.pcisecuritystandards.org/security_standards/vpa/)

\* Revisions of the list since December 2008 include existing PABP validated vendor name and product name corrections only. All new assessments should undergo PA-DSS validation by a PA-QSA and listing with the PCI SSC.

## List of PABP Validated Payment Applications

PAYMENT APPLICATION VENDOR	PAYMENT APPLICATION	APPLICATION VERSION	VALIDATION DATE (1)	ASSESSOR	VALIDATED TO PABP VERSION	DESCRIPTION
/n software inc. <a href="http://www.nsoftware.com">www.nsoftware.com</a>	IBiz E-Payment Integrator	3	October 31, 2008	K3DES	1.4	Suites of software components for integrating payment applications with payment processors
